

The 2020 JFES Virtual Seminar November 4-5, 2020 15:00 – 17:30

Please join, all are welcome!!

As per the previous announcement, JFES had to cancel the annual symposium 2020 due to COVID-19 pandemic. To provide the occasion to exchange the technical opinions over the industry, JFES will host the virtual seminar in two days – **November 4th-5th 2020**.

This event is mainly composed by two parts – presentation style talks and networking time in the breakout room to have an interactive discussion with the speakers.

The first day (4th November):

Industry professionals and University student. Planned topics are as follows.

- **Supercritical carbon dioxide fracturing**
- **Porosity complexity in carbonate reservoir** (日本語での講演)
- **Porosity evaluation in the scientific research area** (日本語での講演)

The second day (5th November):

Oilfield service companies' talks. Planned topic is as below. Schlumberger, Emerson and Halliburton are invited to present.

- **Machine Learning application for reservoir characterization**

Schedule:

- **15:00 – 17:00:** Online talk (3 speakers, 30mins talk + 10 mins Q&A for each)
- **17:00 – 17:30:** Networking time

At the end of each days, the networking time will be arranged with each speaker to have much interactive and deep discussion with participants in the **virtual breakout room**.

This participation to this event will be **free of charge**. We are looking forward your participation as it will be great opportunity for all of you to exchange the opinions!!!

Registration Procedure:

To be announced soon

Participation System:

Microsoft Teams meeting

Announced at 14 September 2020
